A MESSAGE FROM THE CEO

When we formed Avanos in 2018, we took great care and consideration in establishing our Vision, Mission and Values – the guiding principles of our business. It is with these principles and the clearly defined plans that support them that we serve our customers, employees and shareholders.

Now, in our second year, our focus is on acceleration – pushing forward to achieve the goals we set for ourselves as part of our formation. We recognize that progress is only attainable through change, and we will never allow ourselves to become complacent or content with the status quo.

Despite the industry challenges we faced in 2019, we made great progress in a number of areas, including the completion of the many projects associated with the sale of our S&IP business; investing in priority areas to fuel our growth; and completing several acquisitions to sustain our long-term strategy.

And while we recognize the need for continued growth and transformation to meet the changing requirements of our stakeholders, one area where we will never waver is in our commitment to operating as a good corporate citizen. Our stakeholders inspire us to do better while pursuing our vision of being the best at getting patients back to the things that matter.

We recognize that financial performance means little unless it goes hand in hand with responsibility and integrity. We champion causes that benefit not only our company, but the communities where we live and work. We continue the fight against opioid abuse by finding innovative pain relief alternatives. And we partner with suppliers who share our values and operate sustainable businesses ethically and safely.

We're pleased to share this report with you, and thank you for your interest in Avanos!

Joseph F. Woody
Chief Executive Officer
Avanos Medical

ABOUT ΔVΔNOS

This report covers the period of January 1 through December 31, 2019.

OVERVIEW

Avanos is a medical device company focused on delivering clinically superior breakthrough solutions that will help patients get back to the things that matter. We are committed to creating the next generation of innovative healthcare solutions to address our most important healthcare needs, including reducing the use of opioids while helping patients move from surgery to recovery.

We develop, manufacture and market our recognized brands in more than 90 countries and hold leading market positions in multiple categories across our portfolio. With corporate headquarters in Alpharetta, Georgia, Avanos operates 8 principal medical device production facilities, employing 4,700 people worldwide. 2019 net revenue was \$698 million.

Avanos Medical, Inc. is traded on the New York Stock Exchange under the ticker symbol AVNS.

BUSINESS

Avanos is comprised of two franchises – Pain Management and Chronic Care. We offer therapies and solutions with a relentless focus on advancing change in the medical device industry to reduce the use of opioids while helping patients recover faster and improve their quality of life.

Avanos is vertically integrated and manufactures most of its products. Each franchise is supported by a dedicated sales force, a customer support team with significant industry experience and robust product training, and customer education programs. Avanos continues to invest in R&D to commercialize new products and to enhance the effectiveness, reliability and safety of our existing products.

RAW MATERIALS

Avanos uses a wide variety of raw materials and other inputs in our production processes. We base our purchasing decisions on quality assurance, cost-effectiveness and regulatory requirements. We work closely with our suppliers to ensure continuity of supply while maintaining high quality and reliability. We primarily purchase these materials from external suppliers, some of which are single-source suppliers.

Global commodity prices can affect pricing of certain raw materials we use. The prices of resins and finishing supplies often fluctuate in response to changes in oil prices. Prices of these commodities can be volatile and have varied significantly in recent years, contributing to fluctuations in our operating results. More information can be found in our SEC filings.

Avanos relies on product materials and inputs, such as polyethylene and other commodities, in the manufacture of polymer products that are developed and sold globally.

Materials Used (MT)	2019
Polymers	1,820 MT

GOVERNANCE

Our culture is based on our commitment to operate ethically and in compliance with applicable global laws and regulations. Our governance for overseeing and managing our business includes:

- A board of directors that is 89% independent
- A clear reporting structure and lines of accountability
- A global code of conduct
- A comprehensive policy platform, including policies on human rights, labor, diversity and inclusion, and environmental issues
- Oversight on key environmental, social and governance issues

Board Diversity Overview	2019	% of total as of December 2019
Independent members	8	89%
Women	3	33%
Minority group membership	0	
Total board members	9	

Avanos' board of directors provides oversight and guidance on all aspects of our businesses and relationships with stakeholders. Our annual proxy statement contains detailed information on our board and committee structure, the independence of the members, and the responsibilities and meeting frequency of the board and each committee. The board has established the following committees: audit, compensation, compliance, executive and governance. Each committee is responsible for reviewing policies on matters relevant to that committee.

Avanos has a robust compliance and ethics program, overseen by the board's compliance committee, the Management Compliance Oversight Committee, our chief ethics and compliance officer and our senior vice president of global quality assurance, regulatory affairs and product safety. Key components of that program include: our quality and regulatory policies and procedures, which are designed to ensure compliance with applicable laws and regulations; and our anti-corruption policies and procedures, which are designed to ensure compliance with global anti-corruption standards, including the United States Foreign Corrupt Practices Act and the United Kingdom Bribery Act.

COMPLIANCE

The development, manufacturing, marketing, sale, promotion and distribution of Avanos products are subject to comprehensive government regulation. Government regulation by various national, regional, federal, state and local agencies, both in the United States and other countries, addresses (among other matters) inspection of, and controls over, research and laboratory procedures, clinical investigations, product approvals and manufacturing, labeling, packaging, marketing and promotion, pricing and reimbursement, sampling, distribution, quality control, post-market surveillance, record keeping, storage and disposal practices.

COMPLIANCE continued

Avanos operations are also affected by trade regulations in many countries that limit the import of raw materials and finished products, and bylaws and regulations that seek to prevent corruption and bribery in the marketplace (including the United States Foreign Corrupt Practices Act and the United Kingdom Bribery Act, which regulate corporate interactions with government officials) as well as regulations that require safeguards for the protection of personal data. In addition, Avanos is subject to laws and regulations pertaining to healthcare fraud and abuse, including state and federal anti-kickback and false claims laws in the United States. The Physician Payment Sunshine Act, and comparable laws in other jurisdictions, also require Avanos and other manufacturers to annually report payments and items of value given to hospitals and doctors.

POLITICAL SPENDING AND LOBBYING

In 2019, Avanos engaged in federal lobbying activities in the United States in an effort to help alleviate the opioid crisis. We engaged the consulting firm ADVI to advise and represent the company on Medicare coverage and payment policy issues tied to the opioid issue before the Centers for Medicare and Medicaid Services (CMS). We engaged the law firm Polsinelli PC to advise us and lobby on our behalf before the U.S. Congress and CMS to help ensure non-opioid alternatives like our pain management devices are appropriately accessible to patients and providers to avoid the use of opioids. Avanos is also a member of AdvaMed, a medical device industry association, which lobbies on behalf of its members.

Avanos does not currently operate a political action committee (PAC) in the United States or elsewhere. Similarly, the company makes no contributions to political candidates, PACs that contribute to candidates, or other organizations formed solely for the election or defeat of a public official in the United States or elsewhere.

PROTECTING HUMAN RIGHTS

We respect international social compliance and environmental principles aimed at promoting and protecting human rights and the environment. Avanos also promotes human rights in our supply chain through our Supplier Social Compliance Standards. The standards are designed to identify, prevent, mitigate and account for human rights violations, with a focus on countries at high risk for human rights abuses.

Our board of directors' Audit and Compliance Committees oversee our efforts to ensure compliance with the Avanos Code of Conduct, other internal policies and certain legal and regulatory requirements.

EMPLOYEES

DEMOGRAPHICS

Employees are our most-valued resource and are at the center of everything we do. Their talent, diversity and commitment are crucial to our innovation and success. Our work environment fosters personal, professional and corporate growth and nurtures innovation through product development and customer solutions. Our global teams work together in a spirit of cooperation to improve health and healthcare every day.

Salaried Employees	2019	% of Total
North America	4,471	94.36%
United States	1,084	22.87%
Canada	2	0.00%
Mexico	3,385	71.44%
Latin America	5	0.10%
Europe, Middle East and Africa	155	3.27%
Asia-Pacific	107	2.25%
TOTAL	4,738	

Employee demographics represent the count as of December 31, 2019

COMPENSATION

Avanos compensates employees competitively and fairly in markets throughout the world. Compensation for salaried employees is strongly tied to performance objectives. Salaried employees above a certain pay grade have a substantial portion of their total compensation subject to performance objectives. More about our executive officer compensation can be found in our 2019 proxy statement.

OCCUPATIONAL HEALTH AND SAFETY

Avanos has undertaken a detailed plan for risk assessment and mitigation; upgrading safety management systems; issuing communications; and establishing a metric for safety initiatives based on leading metrics. Our operations leadership and management teams all have a safety component to their annual performance objectives and actively participate in the programs. Our safety goals involve creating total employee awareness, solid risk management and facility/equipment compliance, and high individual accountability for safety. We believe strongly in the recognition and celebration of outstanding achievements in safety.

2019 Health and Safety Highlights

8 of 12 locations recorded accident free

Equipment risk scores reduced 14% year-over-year through improvement or replacement

Performed 3,697 behavior-based safety observations

Safety indicators (leading and lagging) monitored and reported as improvement measures

Accident-free facilities recognized with Crystal Eagle Award

Updated company *Environmental, Health and Safety Policy Manual*

EMPLOYEES

OCCUPATIONAL HEALTH AND SAFETY continued

Employee Safety (Calendar Year)	2019
Fatalities	0
Permanently disabling injuries	0
Total reportable incident rate (TRIR)	0.13
North America	0.13
Europe	0.00
Middle East and Africa	0.00
Lost-time reportable incident rate (LTRIR)	0.10
North America	0.10
Europe	0.00
Middle East and Africa	0.00
Safety compliance penalties	0

TRAINING AND EDUCATIONAL OPPORTUNITIES

Because Avanos is a medical device manufacturer, employees are regularly trained in key areas required by the FDA and other applicable regulatory authorities, including topics such as documentation, safety, complaint handling, anti-bribery and quality, among others. In addition to regulated training, employees are educated on the Avanos Code of Conduct, so that all employees align with our cultural and behavioral expectations.

EMPLOYEE ENGAGEMENT

Avanos believes that employees who are engaged in their roles, treated as partners in the business and recognized for their efforts, are more satisfied and productive. The company's goal is to ensure that each of its more than 4,700 employees understands how he/she contributes to the company's innovation and growth. This is accomplished through an employee recognition program and ongoing, two-way communications, including videos and podcasts, that allow employees to engage with and hear directly from members of the executive team.

EMPLOYEE WELLNESS

Avanos takes its commitment to the ongoing health and safety of its employees seriously, offering far-reaching health and benefits packages including wellness and health screening/awareness programs in many locations. Wellness initiatives vary by location but include biometric screenings, health assessments, on-site exercise facilities, and employer-sponsored challenges that instruct and foster healthy habits.

EMPLOYEES

DIVERSITY AND INCLUSION

Avanos' diversity and inclusion commitment is aligned to help the company achieve success as we continue to grow our business and develop our workforce. Our employee profile below reflects the results on December 31, 2019.

Employee Diversity	2019
Women – global director and above ¹	25.7%
Ethnic minorities – US director and above ¹	23.8%
Women – global salaried employees	42.5%
Ethnic minorities – US salaried employees	31.8%

¹Leaders in director-level position or higher

HUMAN RIGHTS

The Avanos Human Rights in Employment Policy underscores our commitment to diversity and inclusion. The policy prohibits discrimination and harassment based on race, color, sex, pregnancy, sexual orientation, gender identity, age, religion, creed, national origin, disability, and other categories protected by applicable laws.

Avanos' commitment to protecting human rights is consistent with our respect for one another and our heritage of fairness, honesty and integrity. This commitment is formalized in our Human Rights in Employment Policy as well as the Avanos Code of Conduct. Our policies align with the goals of several international standards, including the International Labour Organization's Declaration on Fundamental Principles and Rights at Work and those of the UN Global Compact.

SUPPLIERS

CORPORATE SOCIAL COMPLIANCE

The Avanos Code of Conduct provides guidance for dealing with our customers, suppliers, other employees, competitors and the public with integrity and in an ethical and appropriate manner.

We respect international social compliance and environmental principles aimed at promoting and protecting human rights and the environment. We integrate human rights into our direct and contracted operations, as well as through our supplier arrangements. Avanos policies align with the goals of several international standards, including the International Labour Organization's Declaration on Fundamental Principles and Rights at Work. These values are formalized in the Avanos Human Rights in Employment Policy and Instructions.

SUPPLIER SOCIAL COMPLIANCE STANDARDS

Social compliance is integral to Avanos' workplace accountability programs. These standards are driven by the belief that good corporate citizenship is essential to our long-term business success and must be reflected in our relationships and actions in our workplaces and the workplaces of those who are authorized to directly supply our business.

DUE DILIGENCE PROCESS

In selecting new, finished-product, contract manufacturing suppliers, Avanos uses a multi-level due diligence process that involves surveys, reviews of supplier policies, procedures, records and background/reference checks.

CALIFORNIA TRANSPARENCY IN SUPPLY CHAINS ACT DISCLOSURE

Avanos evaluates and addresses risks of human trafficking and slave labor throughout its supply chain. Verification of this process is completed by independent audits and/or self-assessments. During these audits, Avanos receives certification from certain of our direct suppliers that the materials incorporated into their products comply with the laws regarding slavery and human trafficking of the country in which they are doing business.

Avanos' Social Compliance Standards and Code of Conduct are enforced to help maintain internal and external social compliance accountability standards and procedures for suppliers, employees or contractors in regard to combating slavery and human trafficking.

CONFLICT MINERALS REPORTING

Conflict minerals are tungsten, tin, tantalum and gold, and any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Democratic Republic of Congo (DRC) or any country that shares an internationally recognized border with the DRC.

Avanos conducts a reasonable country-of-origin inquiry (RCOI) to determine whether any materials used in our products originated in the DRC or an adjoining country or were from recycled or scrap sources. A summary of our RCOI, as well as the steps taken to exercise due diligence on the source and chain of custody of our product materials, is included in our Conflict Minerals Report, which can be found in our SEC filings.

COMMUNITIES

COMMUNITY RELATIONS

Avanos strives to improve the well-being of the people it touches every day through a range of health, humanitarian, economic and environmental initiatives to help sustain the communities where our employees work and live. We maintain strategic partnerships with global organizations that address issues related to our business and that are of interest to our employees, customers and global communities.

SUPPORTING UNITED WAY

Since Avanos' inception, employees across the U.S. have participated in United Way campaigns that provide funding, resources, volunteers and other support targeted at advancing the common good by creating opportunities for all. The employee contributions and company match give Avanos a meaningful way to support neighbors, friends, families and co-workers in its communities through fundraising and volunteer activities.

VOLUNTEERISM AND GIVING

Throughout the year, Avanos employees around the world participated in multiple volunteer activities with local nonprofit organizations.

Avanos' Matching Gifts program enables U.S. employees to double their donations to qualified charitable organizations. All contributions over \$50 and up to \$1,000 annually per employee to qualified organizations, such as not-for-profit entities and schools, are matched 100 percent by Avanos.

PRODUCTS

SUPPLY CHAIN

Maintaining a responsible and resilient supply chain is a business imperative, and our relationships with suppliers are essential to our ability to deliver on promises to customers and other stakeholders. Avanos seeks to do business with suppliers who share our values of quality, service, fair dealing and our commitment to being a responsible corporate citizen.

The Supplier Social Compliance Standards (SSCS) are a vital pillar of Avanos' supply chain and align with our Code of Conduct and Human Rights in Employment Policy. These standards are driven by the belief that good corporate citizenship is essential to our long-term business success and must be reflected in our relationships and actions in Avanos workplaces and the workplaces of those who are authorized to directly supply our business. The practices reflect the values we uphold in our own policies, and we expect our suppliers to follow these standards and requirements.

QUALITY

Ensuring quality is an essential part of Avanos' business strategy, and a culture of quality is the foundation for meeting the expectations of healthcare providers and their patients. It is our policy to design, manufacture, deliver and service products that meet or exceed customer expectations for quality, performance and value. We accomplish this by:

- establishing quality objectives, processes, procedures and practices that meet or exceed customer and regulatory requirements
- establishing accountability for quality systems management
- providing resources necessary to execute the quality management system
- conducting regular assessments of quality systems and practices to promote continuous process, product and service improvement, and to ensure compliance with applicable laws and regulations

External regulations and industry best practices, as well as internally developed standards, define our quality criteria. Programs are established to measure compliance with these and report results to senior management. These quality standards and established quality system processes drive the continuous improvement activities that ensure that Avanos products are safe and effective for customers.

Should they become necessary, product field action/recall programs are in place to promptly address potential product or safety issues. These processes are tested periodically to ensure that they are effective and efficient.

In 2019, the following voluntary field actions/recalls were conducted by Avanos:

Product	Regions
Missing Cannulator in TJ Tube, surgical Placement Kit - Advisory Notice	Sweden and Russia
Incorrect Secur-Lok Retention Ring of the MIC* Percutaneous Endoscopic Gastrostomy (PEG) Kit with ENFit Connectors - 20 Fr - PULL - Advisory Notice	Italy
Clogged PEG Tube - Recall	US and United Kingdom
Closed Suction Catheter will not suction 5 Fr. - Advisory Notice	Worldwide

PRODUCTS

QUALITY continued

Avanos maintains an ongoing commitment to protecting customer health and safety. Our product-safety scientists are trained and accredited in the fields of toxicology, biocompatibility testing and health-risk assessments. Most have doctoral degrees and several are board-certified by the American Board of Toxicology. Safety assessments conducted by our product-safety experts cover the complete life cycle of a product: research and development, manufacture, sale, use and disposal.

PACKAGING

Our product packaging helps ensure the quality and safe delivery of our products to customers around the world every day. As we focus on continuous improvement, we incorporate sustainable packaging considerations early in the design process, balancing environmental concerns with the need to protect product quality and transport products efficiently and economically. Optimizing packaging designs for patient safety and customer ease of use, while meeting sterilization and supply chain needs, are also key considerations.

UNIQUE DEVICE IDENTIFICATION

Avanos employs Unique Device Identification (UDI)-compliant labeling.

The UDI is a system used to mark and identify medical devices through their distribution and use. This helps reduce medical errors and more quickly identify medical devices in the case of adverse events or recalls, in addition to providing an accessible source of definitive device identification information. Scanning bar codes containing standardized product information not only streamlines recall management and facilitates device data tracking by clinical research registries, but also offers hospitals the opportunity to better manage inventory and integrate standardized product information into their electronic medical records.

Using UDI to document the device(s) in a patient's record improves the accuracy of surveillance and patient care, and furthers our mission to be the best at getting patients back to the things that matter.

ENVIRONMENTAL

Striving for clean air, clean water and a healthy environment is fundamental to the way we manufacture our products. As in previous years, we continue to rigorously track and report metrics related to waste, utilities and regulatory activity in all owned facilities and buildings within our scope of responsibility.

MANAGING WASTE

Avanos has worked diligently to be 96.5% landfill-free of manufacturing waste. However, our goal remains 100%. This is a goal that Avanos has been purposefully pursuing and will continue to set as a priority.

Because managing waste is important to our stakeholders, and because the majority of our products are single use, we have made waste management a key priority.

Nonhazardous Waste (MT)	2019
Percentage of Nonhazardous Waste Diverted from Landfill	96.5%
Total Nonhazardous Waste Generated [MT]	1,236.5
Landfilled [MT]	43.5
Incineration w/o Heat Recovery [MT]	162.8
Waste-to-Energy [MT]	0.3
Recycled [MT]	1,027.9
Re-used [MT]	2.1

Hazardous Waste (kg)	2019
Percentage of Hazardous Waste Diverted from Landfill	100%
Total Hazardous Waste Generated [kg]	103,350.7
Landfilled [kg]	0.0
Biological Treatment [kg]	0.0
Blended Fuel [kg]	50,621.1
Chemical Treatment [kg]	5,859.0
Deep-Well Injection [kg]	0.0
Incineration w/o Heat Recovery [kg]	41,752.0
Permanent Storage [kg]	3,172.7
Recycled [kg]	1,709.0
Surface Impoundment [kg]	237.0
Thermal Treatment [kg]	0.0

ENVIRONMENTAL

MANAGING GREENHOUSE GAS EMISSIONS

Our measurements track Scope 1 (direct) emissions, which includes on-site fuel generation. We also track and report Scope 2 (indirect) emissions, which include electricity, steam and other energy generated off-site and purchased by Avanos.

Energy Efficiency (million Btu)	2019
Total electricity purchased	73,972.00
Total electricity generated*	874.93
Total fuel oil	0.00
Recycled	0.00
Other natural gas	2,889.25
Total biofuel purchased	0.00
Total steam generated	0.00
Total energy purchased	76,861.25
Percent of biofuel purchased	0.00

*Renewable energy is generated at our Tijuana plant.

Our Tijuana facility now generates 15% of its electricity from its Photovoltaic system.

Greenhouse Gas Emissions (CO ₂ e)	2019
Scope 1 (direct)	191.58
Scope 2 (indirect)	9,818.63
Total emissions (tCO ₂ e)	10,010.21

MANAGING WATER USE

Although water is not utilized in many Avanos processes, water is measured and recorded for manufacturing water use, tracking it to its discharge destination. We monitor and treat the water used in our processes to be in compliance with applicable standards and requirements before returning it to the environment.

Manufacturing Water Use [m ³]	2019
Influent	50,967
Surface water	0
Municipal water	38,365
Ground Water	12,602
Effluent	29,257
Surface water discharge	0
Municipal water discharge	29,257
